EyeNet Vision Business Plan

A comprehensive business plan for an intelligent vision technology platform addressing the \$2-4 billion vision analytics market.

Executive Summary

EyeNet Vision is a dual-model (B2B enterprise + B2C consumer) intelligent vision technology platform providing six specialized applications across security, marketing, compliance, and operations verticals.

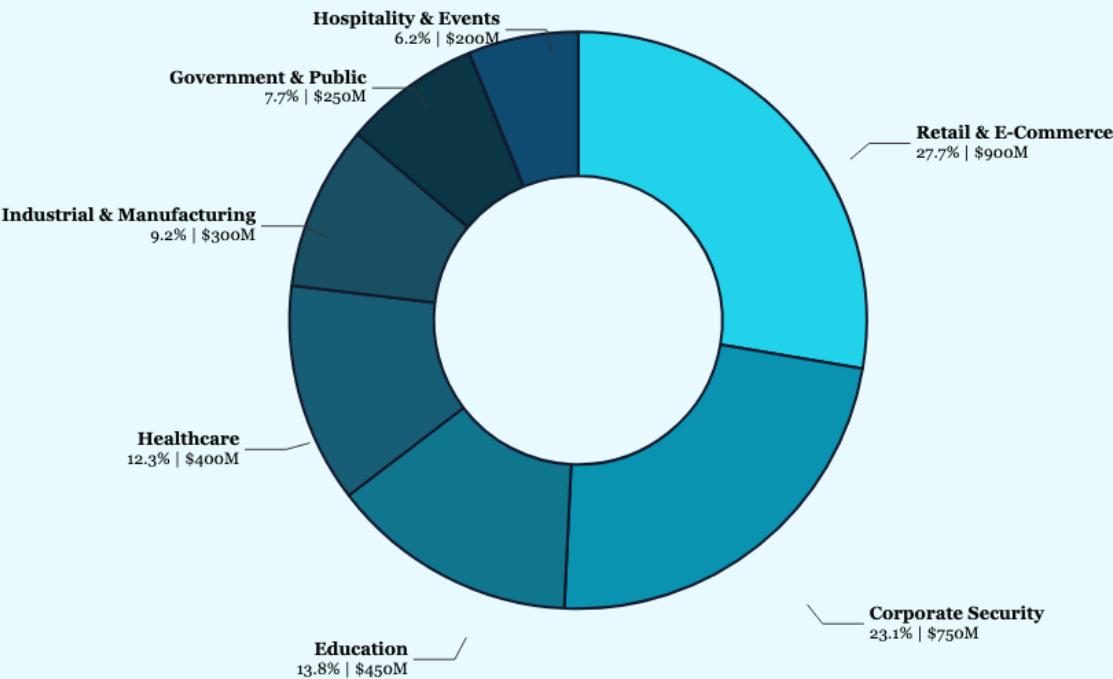

Document Structure

This business plan is organized into the following sections:

Investor Strategy

Investment rounds overview, valuation timeline, and clear exit paths (IPO or strategic acquisition).

Total Addressable Market by Vertical (\$3.25B)

Key Highlights

Investment Opportunity

- **Market Size:** \$2-4B addressable market
- **Revenue Trajectory:** \$1M (2026) → \$8M (2027) → \$26M (2028)
- **Target Exit:** \$500M-\$1B valuation (2029-2030)
- **Business Model:** Dual B2B enterprise + B2C consumer
- **Products:** 6 specialized applications ready for launch

Strategic Advantages

- **Privacy-First:** All processing and storage on-premises
- **Offline-Capable:** Full functionality without internet
- **Infinitely Scalable:** From single camera to enterprise-wide
- **Secure by Design:** Encrypted, access-controlled, VPN-ready
- **Integration-Ready:** REST APIs, webhooks, third-party connectors
- **Event-Driven Intelligence:** Automated actions based on real-time analytics

Navigation

Use the sidebar navigation to explore each section of the business plan. Each section includes detailed analysis and placeholder areas for charts and visualizations that will be added after review.
